UNGA IN

Background and rationale

In Sweden there are over 190,000 young people aged 16-29 who neither work nor study (2010). More than 77,000 young people have neither worked nor studied for 3 years in a row (2008-2010). 20,000 of these (10,000 aged 16-24) have no known activity. These young people run a high risk of being permanently excluded from society. According to several studies specific measures targeted at NEETs are needed in order to reintegrate young people in society.

Aims and objectives

Unga in is a national EU-funded project owned and run by Arbetsförmedlingen (Swedish Public Employment Service) aiming at developing methods for working with NEETs. The project targets young people aged 16-24 who are not working, studying or in training, and who have no known activity planned. The project aims to include young people in work or study, as well to apply work methods based on young people's individual needs and circumstances. Unga in is run in five municipalities: Stockholm, Goteborg, Malmö, Gävle and Skellefteå. Unga in is co-financed by the European Social Fund and the municipalities.

Timeframe 1 June 2012- 31 May 2014 **Human Resources** Approximately 65 employees.

Budget and source of financing Total budget: 6.5 million Euro. European Union grant (ESF): 2.8 million Euro.

Activities

Budget and source of financing Total budget: 6.5 million Euro. European Union grant (ESF): 2.8 million Euro.

Activities

1) Outreach activities by young people who are employed and who have similar background as the target group. 2) In-depth holistic mapping. 3) Parallel measures within educational and vocational guidance, and preparation for employment.

Success factors

Identified success factors are multi-skilled teams composed of various functions within Arbetsförmedlingen and the municipalities; local outreach activities led by young marketers with similar backgrounds as the target group; entrusting relationships with employers; and a holistic approach based on the individual needs and circumstances.

Results

Until 31th December 2013 906 unique young people have participated in Unga in. A total of 354 have been deregistered from Arbetsförmedlingen since 1 June 2012 (328 during 2013). Out of these 22 percent left due to work, 32 percent left due to studies, 24 percent left due to another known reason (for example to the health care system or the Prison and Probation Service) and 22 percentt left due to an unknown reason.

Partners Municipalities and other public bodies.

Welcome to SOS Network

Methods and Tools to Remove Barriers to Learning and Employment

The **SOS Network** portal is an online community for teachers, trainers, employers, counsellors, carers and students to meet and share knowledge on how to help students succeeding with education and access to the labour market. The **SOS Network** portal provides users with real life cases, proven **methods and tools** and access to experiences from practitioners across Europe. The **SOS Network** portal also gives you an opportunity to contribute with your own stories, resources, methods, tools and comments.

With the **SOS Network** portal you can Identify barriers to learning and employment, discover how some have succeeded in overcoming those barriers. Finally, you can find a number of methods and tools selected by the **SOS Network** to address those issues.

If you are interested in contributing further to the goals of the SOS Network community, you can do so by joining the SOS Network Portal.

Towards Inclusive Educations

Madrid 27 March 2014

Knowledge and Consciousness of an Inclusive Context to Avoid Early School Leaving

Conference Registration Open

Providers of education and training in most parts of Europe request well-proven methods and approaches to include students with special needs into vocational education and training and onto the labour market. Many different stakeholders have dealt with this issue at national and European level, in different contexts and with different objectives. The main conclusion from all these initiatives is that it will not be possible to find one solution that covers all aspects, and that a diversified and flexible approach seems to be the most relevant to apply.

Willkommen

Wie resilient sind Sie? Unter Resilienz versteht man psychische Widerstandskraft, die Fähigkeit, mit Schwierigkeiten und Rückschlägen gut umgehen zu können. Dieses Projekt stellt einige Materialien zur Verfügung, mit denen man Resilienz trainieren kann.

Wissenschaftliche Forschung belegt, dass jene Menschen, die volles Vertrauen in ihre eigenen Möglichkeiten haben, im allgemeinen auch leichter mit großen Herausforderungen fertig werden. Zudem sind sie viel weniger gefährdet, an Angststörungen oder Depressionen zu erkranken und obendrein sind resiliente Menschen auch viel erfolgreicher in ihren Ausbildungen oder in ihren Jobs.

Durch konsequentes Resilienz-Training können Menschen wichtige Eigenschaften festigen wie z.B. ein gut funktionierendes Stressmanagement, oder einen flexibleren Umgang mit großen und kleinen Schwierigkeiten. Generell haben resiliente Menschen ein viel positiveres Bild von sich selbst und ihrer Zukunft. Resilienztraining stiegert also auch die Zuversicht und unterstützt Menschen, selbst aktiv zu werden um ihre persönlichen und beruflichen Ambitionen verwirklichen zu können.
